

QS Cylinder for reducing CO₂

Simply changing to a QS cylinder will contribute to your company's de-carbonization efforts.

QS cylinder is a cylinder manufactured for the purpose of shortening cycle time.
Greatly help reduce CO₂ emissions.

If you change the NFA type with 90 seconds per cycle to QS type.

**Reducing
cycle time 2.5 Sec**

If use 150k shots...

Reduce CO₂

**Approximately
2.3_t**

How many cedar trees are needed to absorb this carbon dioxide?

 **163 pieces**

※ CO₂ emissions = electricity consumption x operating hours x number of days x CO₂ emission coefficient.
